HALAL SECTOR CAPABILITY REPORTS
HALAL FASHION

دبي عاصمة الاقتصاد الإسلامي
DUBAI THE CAPITAL OF ISLAMIC ECONOMY

EUROMONITOR INTERNATIONAL

IFDC
ISLAMIC FASHION DESIGN COUNCIL

HALAL FASHION

The global halal market is estimated to be worth more than US$ 2,300 billion and the value of halal food sector is reaching US$ 700 billion annually. The non-food sector is much bigger, and includes chemicals, healthcare, cosmetics, personal care and pharmaceuticals.

Given the growing demand (both regionally and globally) for Halal compliance of items even in the non-food sector, Dubai Exports has been working closely with various governmental and non-governmental entities like Emirates Authority for Standardisation and Metrology (ESMA), Dubai Islamic Economy Development Centre (DIEDC), Islamic Fashion Design Council (IFDC), among others to ensure that products from the UAE and Dubai are in compliance with both local and international requirements. ESMA, a Strategic Partner of Dubai Exports has also recently confirmed that a number of companies are looking for halal mark and certification for their products and ESMA will provide the opportunity to them in order to ensure that their products are Shariah-compliant and compatible for exports.

DIEDC, who we work closely with, is mandated to establish the infrastructure and a comprehensive framework to oversee the implementation of initiatives that help achieve the tenets of an enabling Islamic economy. The Islamic fashion and design industry is currently fragmented and in need of structure and development. IFDC is a world-class fashion and design platform that supports the needs of the iFash and eventually iDez industry players as well as the consumers. IFDC seeks to surpass all standards of showcasing, business practice, and aesthetic excellence through their vision to provide products and services designed to help the Islamic fashion and Design industry develop. Dubai Exports is working closely with both these entities to help them achieve their goals.

We are thankful to all our above partners as well as Euromonitor International for working closely with us on the launch of our initiative to promote the Halal Design, Beauty and Fashion sectors that will showcase Dubai's vision to become the global capital of the Islamic economy.

Engr. Saed Al Awadi
CEO, Dubai Exports

The Dubai Islamic Economy Development Centre (DIEDC) was established in 2013 by Dubai Law 13 of 2013 and under the supervision of His Highness Sheikh Hamdan bin Mohammed bin Rashid Al Maktoum, Crown Prince of Dubai, to develop and promote Dubai as the global capital of Islamic economy.

The Dubai Islamic Economy Development Centre (DIEDC) is founded on the seven pillars of finance, the 'halal' industry, tourism, digital infrastructure, art, knowledge and Islamic standards. The organization is mandated to establish a sound infrastructure and a comprehensive framework to oversee the implementation of initiatives that help achieve the tenets of an enabling Islamic economy.

Through carefully planned strategies and initiatives, DIEDC is committed to engaging with stakeholders to foster a generation of qualified professionals with the required skill-sets to drive growth across the seven constituent pillars, while creating a dynamic and competitive environment that fuels growth within the sector.

The UAE in general and Dubai in particular are privileged with a diversified, open, and flexible economy capable of accommodating international and regional changes, in addition to having advanced technical and logistic infrastructures, which provide the foundation that qualifies Dubai to develop the Islamic economy sector along with other vibrant economic sectors in the UAE.

Abdulla Mohammed Al Awar
CEO
Dubai Islamic Economy Development Centre

The Halal industry around the world has been gaining interest from the rising awareness of consumers and is providing commercial opportunities for industries to access a significant Muslim market segment.

Halal is an Arabic word meaning lawful or permitted and is connected to all aspects of food, travel, cosmetics, pharmaceuticals, banking and fashion products. The key drivers for growth of Halal are the rising Muslim demographic, economic development of Muslim nations and the increasing awareness of Muslim consumers around the world.

Market research analysts, Natalia Gorzawski and Karen Van Diesen from Euromonitor International and the team at Dubai Exports, have teamed up to put together an overview of the Halal opportunities covering the Beauty and Personal Care, Design and Fashion sectors.

Hussein Doughan
Country Manager
Euromonitor International

EUROMONITOR INTERNATIONAL

Bismillahir Rahmanir Raheem.
Asalamo'Alaikum,
At Islamic Fashion and Design Council (IFDC) we appreciate the way Islamic fashion, design (art, architecture, interiors, etc.), and lifestyle is artistically developing through societies across the world. This interesting journey speaks to the range of Muslims and Islamic design fans we have globally. In fashion, we are seeing a new generation of Muslim fashionistas and stylists combining mainstream fashion choices within the Islamic guidelines, which takes this to a different level from the traditional way. There is no doubt that Islamic fashion will flourish to an exciting scale economically, yet what makes this so special is the consumer's resolve to remain true to their Islamic faith and values, not compromising this at any cost. As for Islamic design, this too is appreciated for its diversity as it can be integrated into architecture, pottery and all art. It is differentiated from other art forms by symbolizing the transcendent and indivisible nature of the Creator, deeming this a most special form of expression.

When the Islamic attire is aesthetically appealing it becomes obvious that Muslims are celebrating their commitment to Allah. After all, Allah is beautiful and He loves beauty! Fashion that is both stylish and appropriate can empower Muslims across the globe to represent Islam with confidence. This will dramatically have a positive impact on their personal image as well as their public image of being ambassadors of Islam propagating it by simply looking impeccable.

As Islamic design expanded and spread throughout the world it encountered other cultures that positively influenced it to grow, flourish and evolve. Muslim artists were able to integrate and demonstrate the rapid scientific development that flourished during the Islamic expansion by utilizing the geometric designs to depict the infinite nature of the Creator. Fashion too became a form of art and was enriched by incorporating patterns that were used in mosques and homes into embroidery and cloth printing. Islamic design represents vibrant colors that are a celebration of nature, which is a blessing from Allah.

The level of beauty we are surrounded by on a daily basis becomes an exquisite Remembrance. Islamic fashion and design continues to undergo a renaissance as many Muslim artists have been exposed to Western art and style or trained in design and want to reclaim and incorporate some of their own rich heritage into their work. There is a lot of fusion of east and west and this influences all areas of fashion and design. We welcome you to join us on this exciting journey that celebrates countless blessings; we look forward to seeing you at Islamic Fashion and Design Council!

Alia Khan

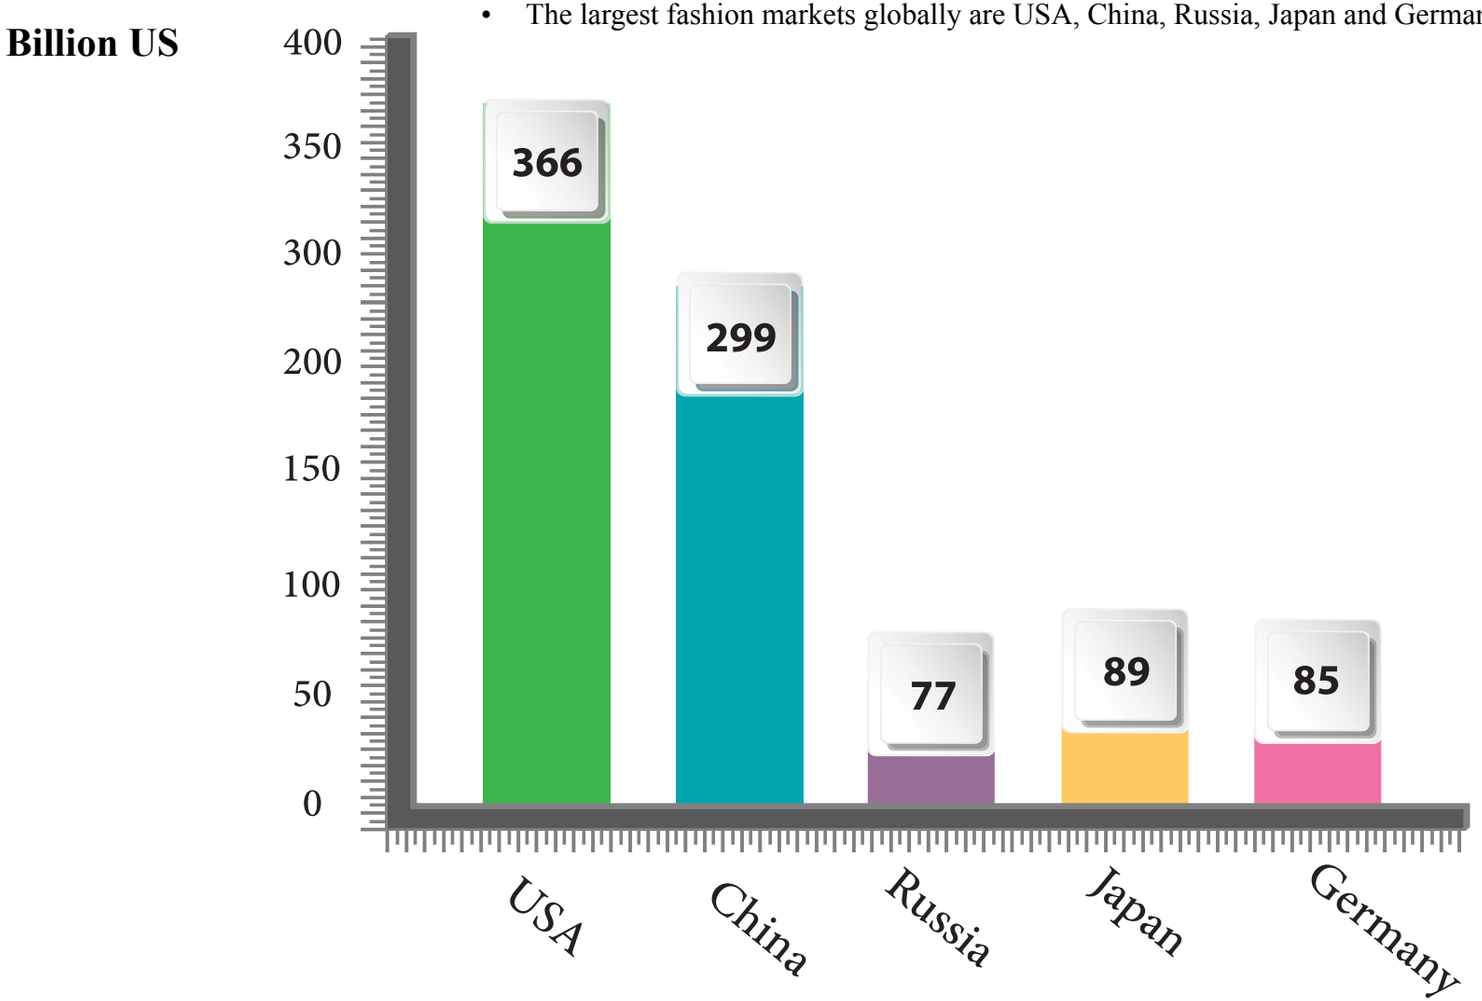
IFDC
ISLAMIC FASHION
DESIGN COUNCIL

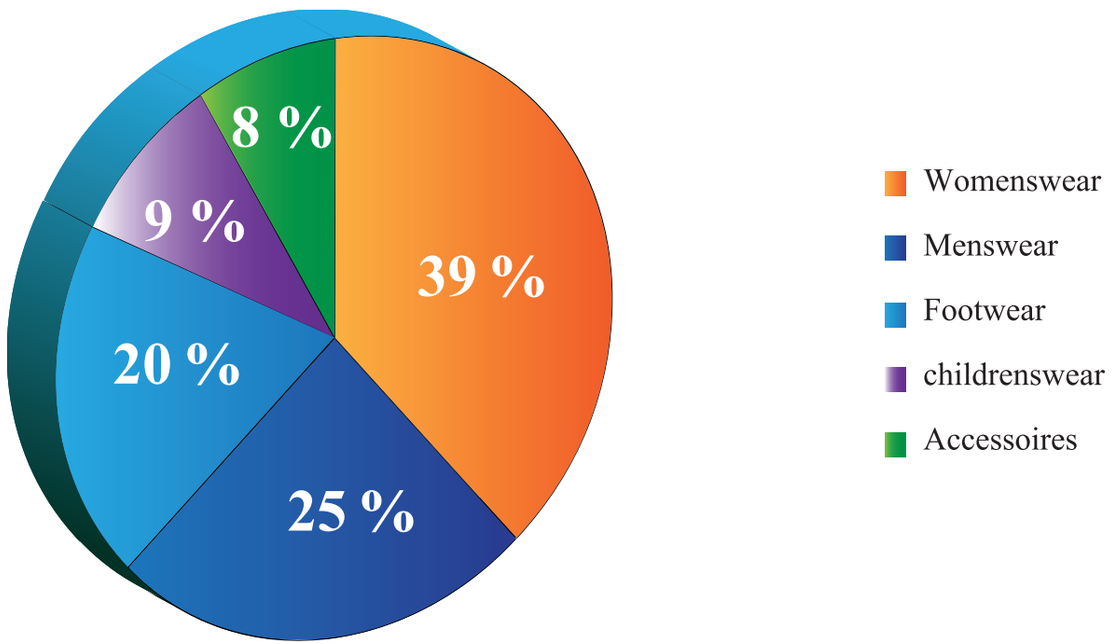
- According to Euromonitor International, the total value of the global fashion market registered at US$1772 billion in 2013.
- The largest fashion markets globally are USA, China, Russia, Japan and Germany.



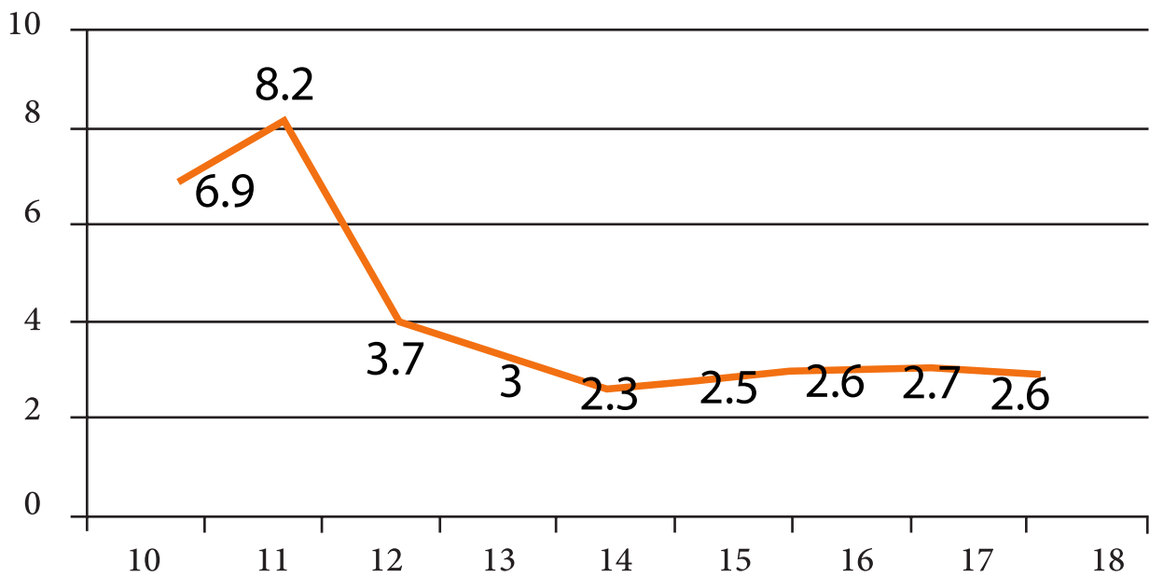
THE GLOBAL FASHION INDUSTRY

- The most important categories within the global fashion industry in 2013:

Global Value Sales Split in 2013



- The global fashion industry registered three percent in value growth rate and it is expected to grow to 2.6% over the forecast period 2014 to 2018.



- Euromonitor International forecasts a slowdown in the global fashion market over the forecast period 2013 to 2018. To maintain profitable, fashion companies need to target consumers worldwide with new and innovative strategies.

THE GLOBAL FASHION INDUSTRY - OPPORTUNITIES

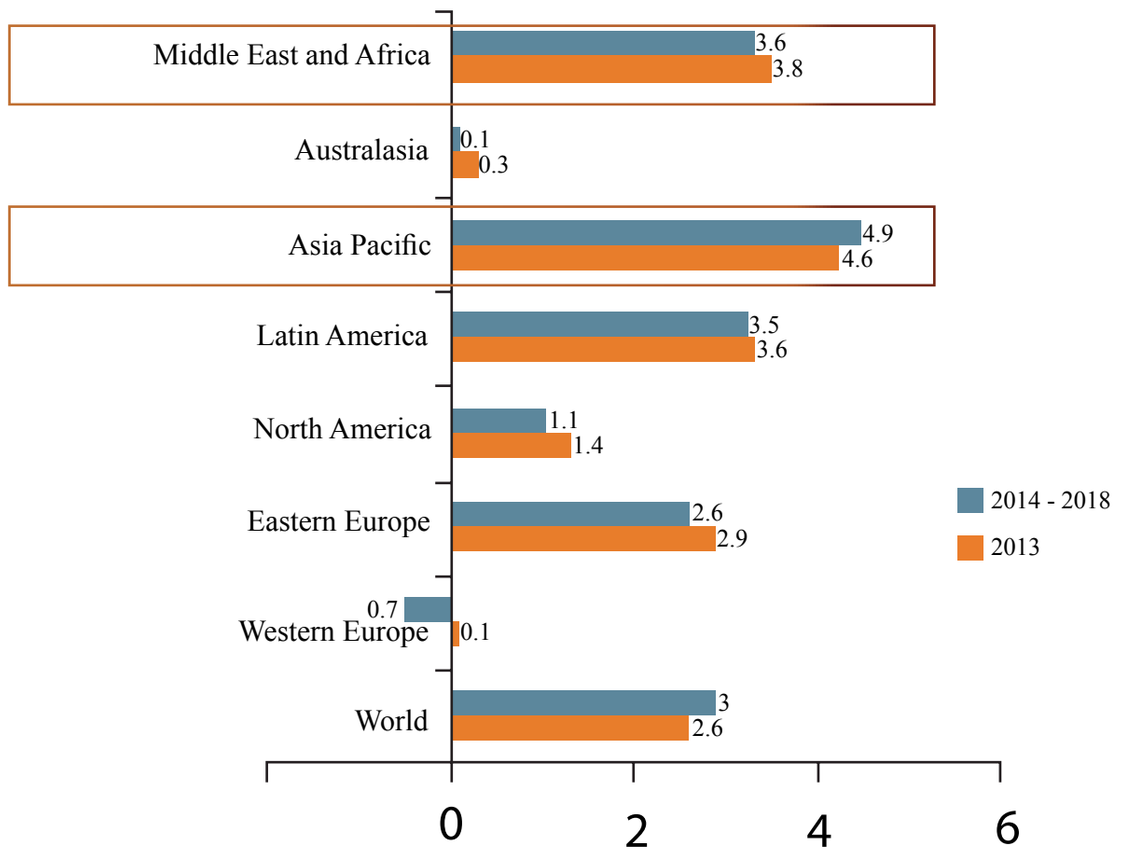
Growth opportunities for the fashion industry lie in:

1. Developing countries: The population is young; disposable incomes are increasing and expanding product portfolios are creating awareness for different product segments.

2. Niche markets: Cater specifically to regional or religious values, demands and traditions, which often have a strong influence on buying decisions and consumption patterns, thus offering various opportunities for new product developments in niche segments.

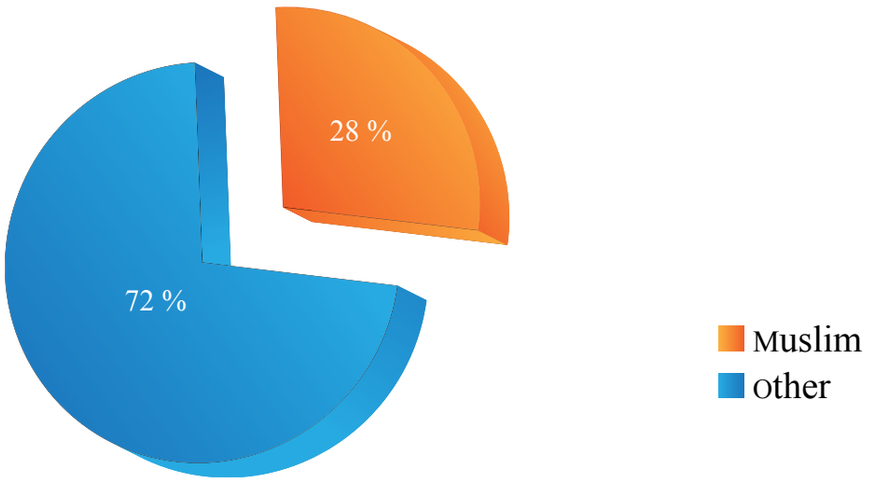
The two fastest growing regions, Asia-Pacific and Middle East and Africa, together represent 80% of the Muslims worldwide

The fastest growing regions worldwide are in the developing world:



THE MUSLIM POPULATION WORLDWIDE IS GROWING

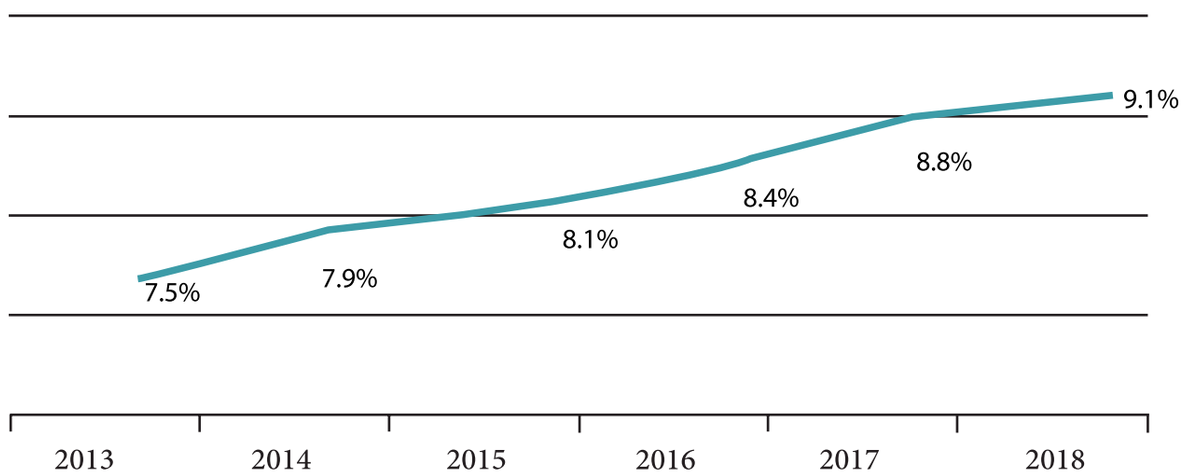
- There are approximately two billion Muslims living on planet earth, accounting for 28% of the worldwide population.
- 80% of Muslims live in developing countries in the Middle East, Africa and Asia-Pacific. Muslims also form important minority groups in countries such as Russia, China, India and the United States.



- This share of the general population is set to grow as the number of Muslims is growing at a pace of 1.4% vs. 0.7% globally.

AS DOES ITS SHARE OF THE GLOBAL FASHION MARKET

- The population of the 57 member states of the Organization of Islamic Cooperation (OIC) spent $132.9 billion USD on fashion products in 2013, thereby accounting for 7.5% of the global expenditure in this segment.
- As the growing demand for fashion products in OIC countries is outpacing the global rate, the key Muslim countries represented under this umbrella, are set to account for nine percent of worldwide sales in 2018.
- Muslims, thereby, represent a key consumer group with huge growth potential within the fashion market globally.



MUSLIM CONSUMPTION

- The majority of Muslims worldwide view Islam as a path to live all aspects of life and desire to adhere to Islam.
- There is no definitive list of Islamic values, however there are common values across Muslim geographies, such as; honesty, sincerity, respect, kindness, purity, cleanliness, charity, responsibility, transparency, modesty, moderation, community…
- Islamic life values impact the Muslim consumer's needs and desires for all products and services they use daily.
- An Islamic, halal brand provides reassurance for the Muslim consumer that he or she is consuming a safe product within the pursuit of Islamic values.

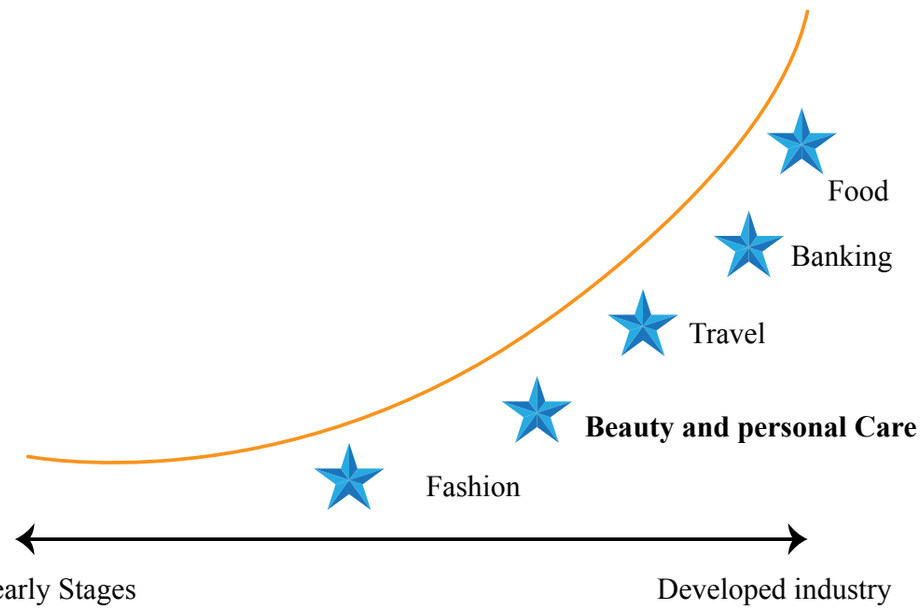
WHAT IS HALAL?

- Halal is an Arabic word meaning lawful or permitted. In reference to food, it is the dietary standard, as prescribed in the Qur'an. The opposite of halal is haram, which means unlawful or prohibited. Halal and haram are universal terms that apply to all facets of life.

- These terms are commonly used in relation to food products, meat products, cosmetics, personal care products, pharmaceuticals, food ingredients, and food contact materials.

HALAL BRAND OPPORTUNITIES PRESENT ACROSS A RANGE OF CATEGORIES

- The most established platform for halal products is Food. Other categories are not yet properly served with brands that uphold Muslim values.
- Developing areas for halal products are banking, travel, beauty and personal care and fashion.

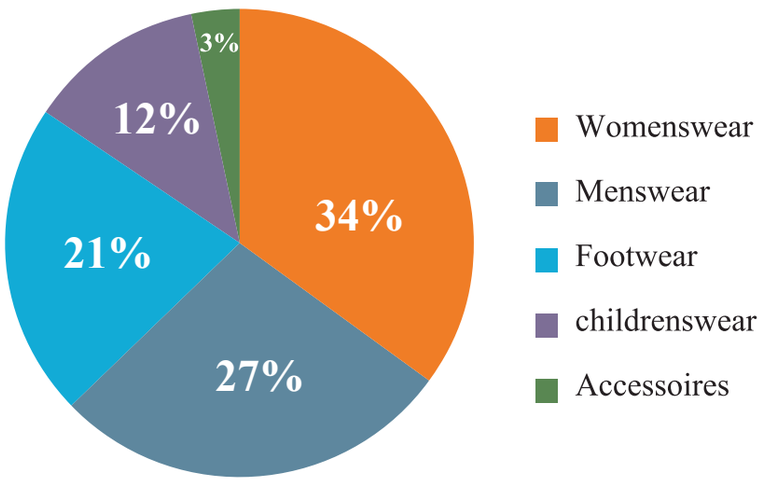


- Halal fashion is in its very early stages of growth, however, it has amazing potential to develop as a key point of differentiation of brands and designers across the globe.

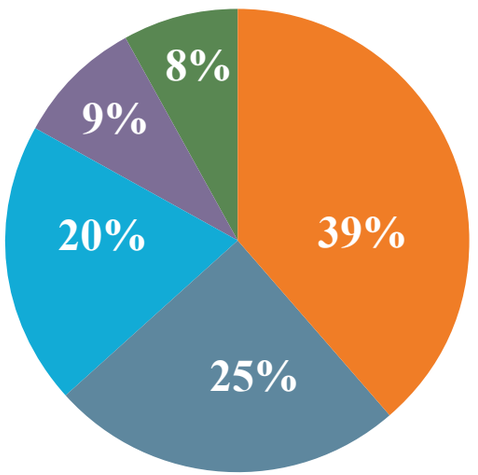
FASHION DOLLARS ARE SPENT SLIGHTLY DIFFERENTLY IN MUSLIM COUNTRIES

- In OIC countries, the sales split is less skewed towards womenswear. Accessories on the other hand, have a far smaller share of three percent vs eight percent globally.

IOC Countries Value Sales Split in 2013



Global Value Sales Split in 2013



THE OPPORTUNITY FOR THE FASHION INDUSTRY

- A new opportunity for the fashion industry is arising as Muslim consumers desire to be fashionably up-to-date while staying true to their Islamic values. There is no longer a clash between faith and fashion.
- In fact, modern Muslim consumers see fashion precisely as an expression of their faith.
- This is, supported by the trend, an increased number of Muslim fashion shows taking place in Europe, the Middle East and South East Asia.

Halal Fashion Production Values

Ingredients, manufacturing process, supply chain and financial services adhere to standards based on Islamic values. For example:

- Restriction on the use of leather from livestock not slaughtered dhabibah;
- Restriction of the use of silk;
- Fair treatment of all production workers;
- There is no global authority on halal certification. While some governments have their own certification boards, others do not;
- Thus, consumers are left to decide and determine according to their own guiding principles.

Halal Fashion Design Values

- Driven by the underlying Islamic value to preserve modesty;
- The way in which this tradition is exercised differs across regions and cultural groups; the variation is in the local colour and heritage;
- Good quality clothing as to celebrate the blessing bestowed upon them.

HALAL FASHION LANDSCAPE ANNO 2014

- The halal fashion industry remains in its early stages of development.
- Progress in halal fashion is driven by local designers and small start-up initiatives that have created a special segment of modest Islamic fashion, such as Shukr in Jordan, Rabia Z in the UAE and Hijub in Indonesia.
- The first established brand to follow the trend was DKNY, which launched its Ramadan summer collection in July 2014.
- However, there is no pure Muslim clothing brand that is global.
- At present, top Western fashion brands have strong presence in many Muslim markets, showing strong opportunities to launch specific halal brands or halal clothing lines.
- According to Euromonitor International, the list below shows the current leading fashion brands in three key Muslim countries:

Saudi Arabia

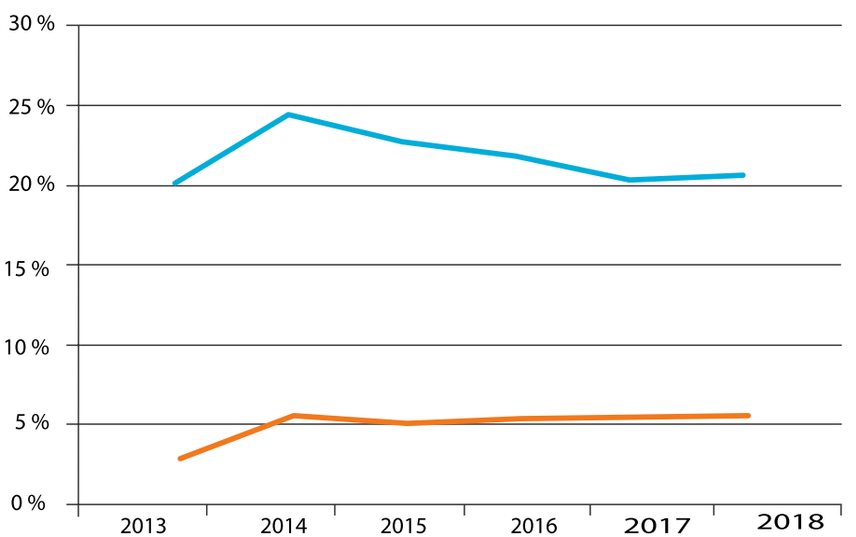
Turkey

Indonesia

INTERNET RETAILING IS THE PRINCIPAL CHANNEL FOR HALAL FASHION

- Internet retailing was the leading channel for halal fashion anno 2014, allowing producers to expand their geographical reach at a relatively lower cost.
- According to Euromonitor International, internet retailing currently accounts for five percent of the total retail sales. The channel is forecasted to reach eight percent of the total retail sales worldwide by 2018. Channel growth will have a positive effect on halal fashion sales.

Constant y-on-y growth till 2018



SWOT ANALYSIS

Strengths

- Large and growing consumer base globally with currently underserved needs and rising spending power.
- Changing mindsets towards uniting Muslim values and modern clothing design.

Weaknesses

- No organized effort in terms of production, retailing etc., making it difficult to reach economies of scale.
- Low awareness among consumers as there are no halal clothing lines in-store.
- Limited halal financing options for startups.

Opportunities

- Room for new initiatives with Halal integrity; from individual designers to startups to new brand concepts from multinational companies.
- Collaboration between Halal banks and Halal fashion SME's.
- Development of an industry standard for Halal fashion to ensure integrity of Muslim values.

Threats

- Difficult to reach economies of scale as long as halal fashion remains niche.
- Concerns regarding safeguarding of Muslim values in production.
- One-size-fits-all approach is difficult to execute globally: varying interpretations of modesty exist in the Muslim world, thus high need for tailoring to fit needs to local cultures.
